Photo ID's

CC-HMIS has the ability to store a photo for each person in the system. A barcoded photo ID card can then be printed. This provides ease of access to the system for providers and allows a person to have an initial ID.

Programs in 2015

Individual Programs: **16**
Types of Programs:

- Services Only
- Emergency Shelter
- Permanent Housing
- Transitional Housing
- Rapid Re-housing

One System

Each CoC is required to use one HMIS. Through this a community can work together with the shared data to help learn how to better solve homelessness, evaluate performance, and plan.
