Stella Performance Module

Stella is an analysis and strategy tool that helps CoCs to understand how their system is performing and to model an optimized system that fully addresses homelessness in their area. Stella has two modules:

- **Performance (Stella P)** which relies on dynamic visuals of CoCs' LSA data to illustrate how households move through the homeless system, and to highlight outcome disparities.
- **Modeling (Stella M)** assists CoCs to explore how resource investment decisions amplify system capacity to end homelessness. Stella M starts with homeless needs and performance goals, and helps the community transform those needs into a series of resource investment decisions. Stella M is still in production.

Stella P is available now to help CoCs better gauge their progress toward preventing and ending homelessness. Choose a LSA dataset below to start viewing your data in Stella P. If you want to view a dataset that is not shown, then see the Preparing LSA Files for Stella P Guide.

Stella is best viewed with Google Chrome, Mozilla Firefox, or Safari web browsers.

Note: Persons using assistive technology may not be able to fully access information in this site. For assistance with the site or questions regarding how to use it, submit a question to the HDX Ask A Question. Select "HDX" from the "My question is related to" drop down list on Step 2 of the question submission process.
